

All Amerimax Patio Doors Are Available With The Optional Ameriglass™ Low E² and AG³ Systems

EXPANDED VIEW OF AG³ COATING

Ameriglass™ AG³ Low Emissivity glass is coated with a microscopic 12 layer patented formula with three layers of Silver. The ultimate balance of energy savings, solar control and high visibility.

ARGON GAS FILL

Non-toxic, odorless and invisible Argon gas fill enhances the overall energy efficiency and can increase Total Window U Value performance by as much as 12% vs. traditional air fill.

NATURALLY CLEAN GLASS — LET NATURE DO THE WORK

A Titanium Dioxide layer reacts with sun to decompose organic materials on the glass. A Silicon Dioxide layer creates an ultra smooth surface and Hydrophilic action to disperse water evenly or "sheet off".

TRUE WARM SPACER SYSTEM

Thermally non-conductive structural foam spacer creates the ultimate in energy saving performance and long-term durability.

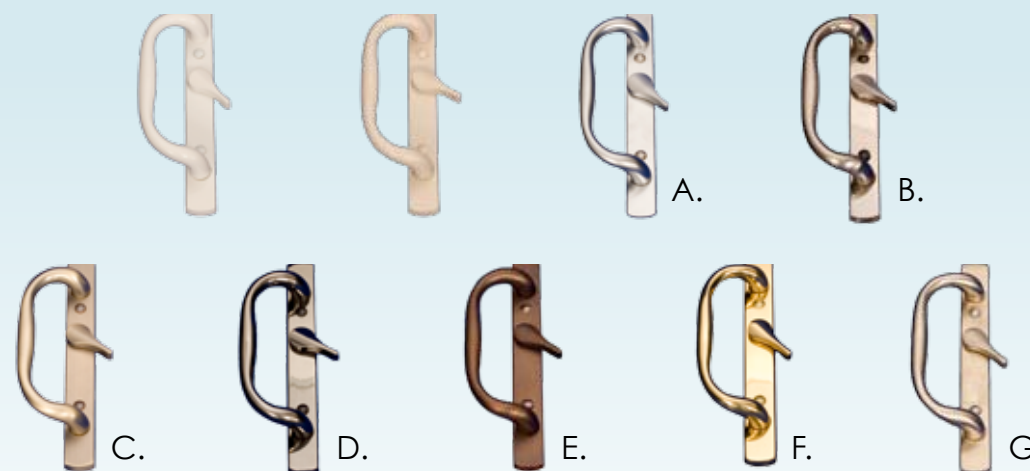

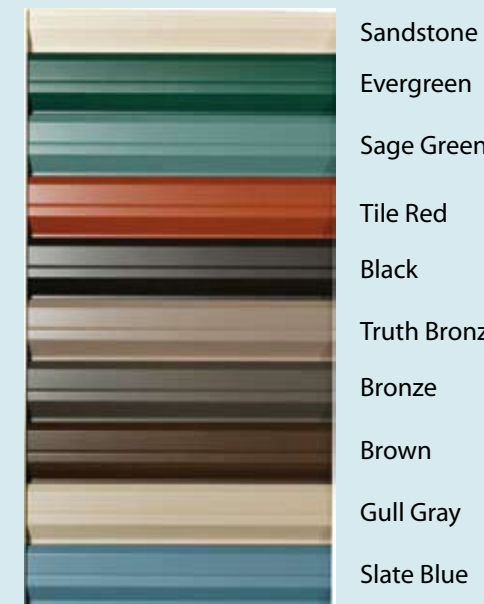

PATIO DOOR OPTIONS

AmeriCoat Coating System

PUT A LITTLE COLOR IN YOUR WORLD . . .

AmeriCoat is a high performance, Eco-friendly, water based exterior coating system available in 10 standard designer colors with a custom color match option.

Now the color of your patio doors can complement your home's style without sacrificing the ease of maintenance and energy efficiency that continues to make Amerimax Windows & Doors the right choice for today's environment.

The New Horizon and Riviera French Slider Series provide White or Desert Sand color matched handles with key lock as standard. Brushed Chrome is standard on the Classic French Hinged Door.

All of our Patio Doors are available with optional hardware choices in the following designer colors: A. Brushed Chrome, B. Antique Silver, C. Antique Brass, D. Antique Nickel, E. Light Oil Rub Bronze, F. Solid Brass, G. Satin Nickel. Please note the colors depicted in this brochure may not be color accurate. Consult your authorized Amerimax dealer for samples.

NEW HORIZON PATIO DOORS

Transform your home with the versatile and elegant designs of the New Horizon Patio Door.

Available in a variety of configurations including 2-panel, 3-panel and 4-panel, and optional overhead transoms, this series will complement any home while offering you unparalleled choices.

Steel reinforcement in the vertical sash rails and interlocking meeting rail provides excellent structural ratings, weather tightness and forced entry resistance.

Fusion welded frame and sash construction insures structural integrity with long-term beauty and durability.

Durable anodized aluminum threshold resists wear from traffic and the elements.

Specially designed raised Monorail Screen Track provides smooth screen operation.

Revolutionary plated steel tandem rollers with Sealed Stainless Steel Ball Bearings offer reduced Friction and Wear to Glide effortlessly on the Aluminum raised Monorail Track with Stainless Steel Cap.

Multi-chambered rigid vinyl extrusions provide strong framework with elegance and durability.

RIVIERA FRENCH SLIDING PATIO DOOR

The sophistication of the Riviera French Sliding Patio Door is reflected in wide rails and contoured moldings that embrace the glass and enhance the refined design.

Combining the traditional wide rail look of a French Door into a sliding door makes it a perfect choice where space or traffic patterns may not allow a hinged or swing style door.

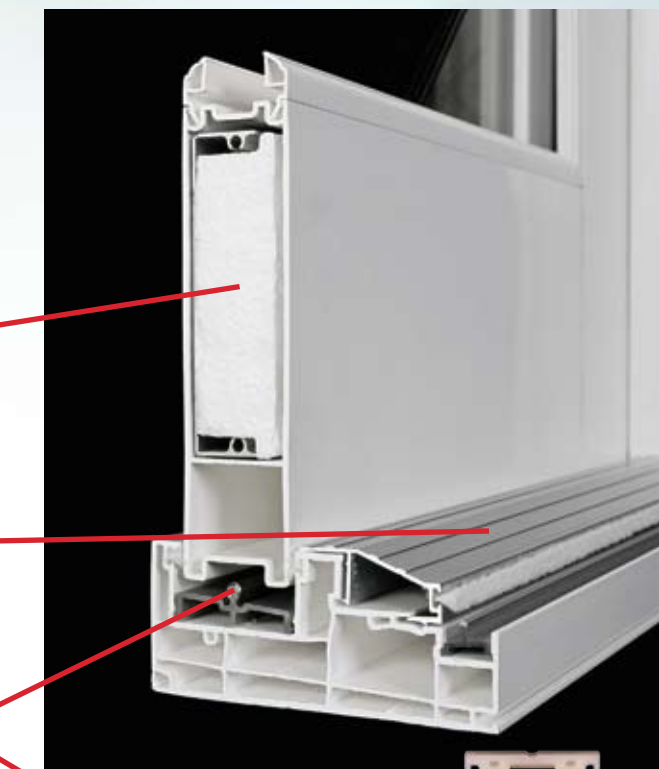

Choose from 2, 3 and 4 panel configurations all featuring smooth gliding operation and space saving style.

In addition to its beauty, the Riviera French Slider incorporates structurally engineered metal reinforcement with thermal insulation into the sash frame to enhance Strength, Rigidity and Energy Efficiency.

Durable anodized aluminum threshold resists wear from traffic and the elements.

Revolutionary plated steel tandem rollers with Sealed Stainless Steel Ball Bearings offer reduced Friction and Wear to Glide effortlessly on the Aluminum raised Monorail Track with Stainless Steel Cap.

CLASSIC FRENCH PATIO DOOR

Amerimax Classic French Patio Doors are available with Single Entry, Center Hinged or True French styles (in swing or out swing).

Optional Side-Lites may be added with matching wide French rail. Choose from operable venting in swing Side-Lites or the traditional fixed lite.

High performance Ameriglass™ Low E² and AG³ options are available to provide maximum Energy Efficiency and UV protection.

The fusion welded sash panels are attached with AmeriHinge™ full height gear hinge.

Sloped anodized aluminum sill resists wear.

Multi-chambered design with structural steel reinforcement in the sashes provide superior strength and durability.

Full perimeter compression weather seal provides protection from air and water infiltration.

AmeriHinge™ System full height anodized aluminum gear hinge provides incredible structural strength to the door panel.

A. Multi-point lock system with solid brass center deadbolt and key lock provide optimal safety.

B. Standard center deadbolt with key lock affords optimum security.

C. Additional flush bolts at head and sill on inactive panel of French door.
